

◆ PROFILE

Artificial Intelligence graduate from Umm Al-Qura University (GPA 3.37/4.00) with experience in team-based controlled computer-vision research, applied machine-learning projects, and a production Arabic educational platform. The linked portfolio includes three browser-based demonstrations built from the documented coursework data and image classes.

◆ EDUCATION

B.Sc. Artificial Intelligence

2022 – 2026

Umm Al-Qura University, College of Computing · Makkah · GPA 3.37 / 4.00

◆ SELECTED WORK

Educational Supervision Platform

Production · 2026

Live Arabic platform · almarefah-supervision.pages.dev

- ◆ Built and deployed Arabic RTL workflows for supervision visits, structured records, dashboards, reporting, access control, and document exports.
- ◆ Exports official records to PDF, Word, and Excel while preserving Arabic RTL document requirements.
- ◆ Cloudflare Pages and Workers, Cloudflare D1, Better Auth, and Backblaze B2.

Comparative Deep-Learning Research for Glaucoma Classification

Team graduation project · 2025 – 2026

- ◆ Controlled comparison of six conditions on 4,828 synthetic retinal fundus images with stratified 3-fold cross-validation.
- ◆ ViT-Small and ResNet-18 feature extraction and fine-tuning; KAN-Transformer and MLP-Transformer trained from scratch. Best reported ResNet18-FT:
[accuracy 0.963](#) [AUC-ROC 0.996](#)
- ◆ Python and PyTorch; calibration, bootstrap confidence intervals, peripheral-occlusion diagnostics, and Attention Rollout.

Interactive academic machine-learning projects

Coursework · runnable in the portfolio

- ◆ **Animal image classification** across nine documented classes. The portfolio retraining used 827 readable coursework images and achieved 88.9% held-out accuracy with local browser inference.
- ◆ **Diamond price regression** from length, width, and depth. Reproduced held-out results: MAE \$241, RMSE \$329, and R^2 0.904.
- ◆ **Obesity coursework model audit** and a documented decision-tree retraining on the same five inputs and 2,086 records; 89.6% accuracy on a 626-record holdout. Educational use only.

◆ TECHNICAL SKILLS

Languages & data	Python, SQL, Java, Pandas, NumPy, Matplotlib
Machine learning	PyTorch, TensorFlow/Keras, scikit-learn, CNNs, Vision Transformers, ResNet, transfer learning
Evaluation	Cross-validation, AUC-ROC, calibration, bootstrap confidence intervals, explainability
Cloud & delivery	Git/GitHub, Cloudflare Pages, Workers, D1, Better Auth, Backblaze B2
